Our Techniques

Use Daily

Light Protection:

A technique that leaves you feeling comforted and secure, rested and at peace.

Grounding:

This technique is unique to the person envisioning it. There will be a stable and grounding effect upon completion.

The Use of Symbols:

The mind is a wonderful thing. This technique creates a short cut for us. So we are able to transcend into restful sleep.

Affirmations:

Affirmations are simple statements that we make every day, positive or negative. With this process we want to make changes to our lives and so.... we build affirmations that will create that for us.

Where ever you go,
whatever you do.
You are protected

White Protective Light then Pink and Purple

Envision your body encased with this soft, smooth divine light, muted colors of warm soft ivories and hues of satin whites. These colors are associated with the divine. Go ahead envision them draping over you, leaving you cozy and warm. Follow this with pink light. This color is associated with love. As a color of protection it comes through the heart and penetrates the soul. Use this layer over the white and infuse the body with loving energy. This is then followed by purple and this is associated with the highest of spirit. When layered over white and pink it becomes the ultimate in protection.

The Grounding Technique How to Ground Yourself

If you are new to this method, I suggest a quiet space so you can picture this in your mind eye clearly. It is best to sit and focus (close eyes) your attention on being calm. Once this is achieved, decide what you want to ground yourself with. I use an anchor, but it can be tree roots, boat chain, or anything else that will give a sense of anchoring or connection. Once you have decided, visualize this item at the base of your spine (while sitting) as you are energy you will be directing this item to the center of the Earth. To feel a sense of connection to the item visualize that, you are the item and send it to the center. Make sure you add momentum and a strong will so it penetrates and acts

as your anchor to the world. When you feel this is s complete open your eyes and be aware of how you are feeling. Once this exercise is complete, there will be a physical sensation that feels like you are more connected, stable and stronger.

The Use of Symbols Our Short Cut

This process is used when you want protection (acting as a umbrella for your intention) and your intent is to short cut your conscious. It is busy with thoughts and images and you want to diffuse this so you use a Symbol. This can just about anything from an apple to an angel. You set the intention (prayer, promise, good thought or purpose) and viola, it bypasses the conscious mind's interruptions and sends it straight through to the subconscious. It is there that you want it, to bring all that you have asked for with your intention.

Affirmations:

Affirmations are simple statements that you make every day, positive or negative. Make your affirmations, positive short and specific. Create affirmations that are present tense so it is easy to run through your mind when you start the process. You want changes made today and all that means is repetition, repetition, repetition. That is the name of this game. Try these:

I am willing to see my magnificence!
I deserve the best and I accept it now.
